Unit 1
Drawing

Summary and Rationale

Participation in the arts as creators, performers/presenters/producers and audience members enables individuals to discover and develop their own creative capacity, thereby providing a source of lifelong satisfaction.

Drawing has creative, expressive and educational value; it remains fundamental to translating and analyzing the world. Drawing remains a central and pivotal activity to the work of many artists and designers – a touchstone and tool of creative exploration that informs visual discovery. It fundamentally enables the visualization and development of perceptions and ideas. The role of drawing in education remains critical, and not just to the creative disciplines in art and design for which it is foundational.

Objectives (SLO)

Students will know:

Creating

Symbols convey meaning agreed upon by a group or culture. Manipulation of the basic elements of art and principles of design for personal expression results in visual communication that may be relevant in a variety of settings.

Visual statements in art are derived from the basic elements of art regardless of the format and medium used to create the art.

There are a wide variety of art media, each having its own materials, processes, and technical application methods for exploring solutions to creative problems.

Each arts discipline has distinct characteristics, as do the artists who create them

Presenting

Students will be able to:

Creating

Give examples of various types of line and line weights found in everyday life (e.g., bricks and mortar, tree branches, architectural details including roofline, windows, doors, etc.).

Use line as the predominant element in the creation of artwork.

Identify mechanical or geometric shapes (e.g., circle, triangle, rectangle, square and cones) found in everyday life. Use shapes as inspiration for original artwork.

Presenting

Create original works of art inspired by influential artists throughout history that changed the perception of art and/or altered art-making methodologies

Talk effectively about art and works of art using the proper terminology. Describe various characteristics and other observations of works of art such as portraits, still life drawings and paintings, landscapes, and non-objective pieces, abstract, and realistic works.

How to interpret, reflect on, and evaluate their own art and the works of others based on characteristics and criteria

Develop a personal philosophy regarding the nature of art and the subject of their work

Preparing and refining artwork for display will have a direct affect on the meaning of the work to the viewer.

Responding

Exposure to a range of art is key to how we interpret, respond, and create art.

Visual statements in art are derived from the basic elements of art regardless of the format and medium used to create the art.

Technical skills, vocabulary and knowledge necessary for creative and expressive production

Appropriate media, subject matter, and symbols for expression

Problem solving techniques for originality, flexibility, fluency, and imagination

Understanding works of art provides insights into an individual's own culture and society, as well as those of others, while also providing opportunities to access, express and integrate meaning across a variety of content areas.

Responding

Respond to art through both objective and subjective responses based on formulated criteria (e.g., design elements and principles, art type and reason for its creation).

Work individually and collaboratively in a medium of choice to create a cohesive two-dimensional visual interpretation of a newsworthy issue or theme of personal significance that shows the use of the elements of line, shape, form, value, texture and color in composition.

Creating

Symbols convey meaning agreed upon by a group or culture. Manipulation of the basic elements of art and principles of design for personal expression results in visual communication that may be relevant in a variety of settings.

Visual statements in art are derived from the basic elements of art regardless of the format and medium used to create the art.

Students will be able to:

Creating

Recognize rough and smooth surface textures that are evident in everyday life (e.g., tree bark, sandpaper, bricks, glass, whiteboard, bar of soap etc.) and collage various found textural materials to create works of art that represent differences in surface qualities

Identify repetition/rhythm/pattern found in the natural world (e.g., tortoise shells, frost crystals, surface of a pineapple, pine

There are a wide variety of art media, each having its own materials, processes, and technical application methods for exploring solutions to creative problems.

Each arts discipline has distinct characteristics, as do the artists who create them

Presenting

How to interpret, reflect on, and evaluate their own art and the works of others based on characteristics and criteria

Develop a personal philosophy regarding the nature of art and the subject of their work

Preparing and refining artwork for display will have a direct affect on the meaning of the work to the viewer.

Responding

Objectives (SLO)

Students will know:

Creating

Symbols convey meaning agreed upon by a group or culture. Manipulation of the basic elements of art and principles of design for personal expression results in visual communication that may be relevant in a variety of settings.

Visual statements in art are derived from the basic elements of art regardless of the format and medium used to create the art.

There are a wide variety of art media, each having its own materials, processes, and technical application methods for exploring solutions to creative problems.

Each arts discipline has distinct characteristics, as do the artists who create them

Presenting

How to interpret, reflect on, and evaluate their own art and the works of others based on characteristics and criteria

Develop a personal philosophy regarding the nature of art and the subject of their work

Preparing and refining artwork for display will have a direct affect on the meaning of the work to the viewer.

Responding

Exposure to a range of art is key to how we interpret, respond, and create art.

Visual statements in art are derived from the basic elements of art regardless of the format and medium used to create the art.

Technical skills, vocabulary and knowledge necessary for creative and expressive production

Appropriate media, subject matter, and symbols for expression

Problem solving techniques for originality, flexibility, fluency, and imagination

Connecting

Relationships exist between visual arts history, culture, and other disciplines

Students will be able to:

Creating

Describe how three-dimensional geometric forms (i.e., cubes, spheres, cylinders and cones) are evident in everyday life (e.g., furniture and architecture, toys, cars, the natural environment, consumer products etc.). Utilize geometric forms as the primary element in original works of artwork.

Recognize proportion as a means of determining the relationship between size and scale in the natural environment and as a compositional tool for artists. Illustrate proportion in original artwork.

Presenting

Identify various artists whose pivotal works of art have influenced a key shift in the art movement

Create original works of art inspired by influential artists throughout history that changed the perception of art and/or altered art-making methodologies

Responding

Describe common and distinctive characteristics of artworks from the diverse cultural and historical eras using age-appropriate stylistic terminology; describe how visual literacy and visual communications surround people in their daily lives; and use observed life situations as inspiration for two and three-dimensional art making influenced by compositional approaches from a variety of styles (e.g., cubism, surrealism, optic art, impressionism etc.).

Employ the element of line, shape/form, texture and color to create a three-dimensional artwork within the parameters of a particular style (e.g., Early American, modern, wearable art etc.) that serves a function (e.g., decoration, furniture).

Connecting

Demonstrate understanding of how personal and social, political or historical context influences artists and his/her work of art. Create a work of art based on a timeless/universal theme and compare the work with works created in different historical, political, social, or personal settings

Respond to art through both objective and subjective responses based on formulated criteria (e.g., design elements and principles, art type and reason for its creation).

Art affects and is affected by the culture and world around us.

Art is related to all other disciplines.

Knowledge of the context of a composition, artist, and culture fosters increased understanding and appreciation of art.

Understanding works of art provides insights into an individual's own culture and society, as well as those of others, while also providing opportunities to access, express and integrate meaning across a variety of content areas.
