

Nutley Public Schools

Physical Education

Grade: 11

Unit 1: Fitness 2	
Summary and Rationale	
<p>Students participating in this fitness unit will experiment with different fitness exercises and activities, and compare the benefits of one technique to another. These students will apply previously learned knowledge with new knowledge to construct a highly beneficial fitness program. This unit is designed to enhance the students' awareness of healthy fitness levels, while providing the students with numerous techniques to increase their own level of fitness. They will each be able to experience how different activities have a different intensity level. Students will apply fitness principles to create a personal fitness plan.</p>	
Recommended Pacing	
2 weeks	
Standards	
Movement Skills and Concepts	
Core Idea	Performance Expectations
Advanced technique and concepts will elevate a student's confidence, performance, skills, and participation in physical activity (e.g., games, sports, aerobics, fitness activities).	<ul style="list-style-type: none"> • 2.2.12.MSC.1: Explain and demonstrate ways to apply movement skills from one game, sport, aerobics, or recreational activity to another including striking skills (e.g., tennis, badminton, ping pong, racquetball, pickleball). • 2.2.12.MSC.2: Analyze application of force and motion (e.g., weight transfer, power, speed, agility, range of motion) and modify movement to impact performance.
The quality of feedback from others, self assessment as well as effort and repetition influences movement skills, concepts, and performance.	2.2.12.MSC.3: Design, lead and critique rhythmic and physical activity that includes variations in time, space, force, flow, and relationships (e.g., creative, cultural, social, aerobics dance, fitness).

<p>Individual and team execution requires interaction, respect, effort, and a positive attitude.</p>	<ul style="list-style-type: none"> • 2.2.12.MSC.4: Analyze etiquette, responsibilities, and preparation of players, officials, trainers, and other participants and recommend strategies to improve their performance, participation, and behavior. • 2.2.12.MSC.5: Develop rule changes to existing games, sports, and activities that enhance participation, safety, and enjoyment.
<p>Physical Fitness</p>	
<p>Core Idea</p>	<p>Performance Expectations</p>
<p>Physical and emotional growth often relies on taking personal responsibility for developing and maintaining physical fitness levels that also provide opportunities for self expression, enjoyment, and emotional satisfaction.</p>	<ul style="list-style-type: none"> • 2.2.12.PF.1: Compare the short- and long-term benefits of physical activity and the impact on wellness associated with physical, mental, emotional fitness through one's lifetime. • 2.2.12.PF.2: Respect and appreciate all levels of ability and encourage with care during all physical activities. • 2.2.12.PF.3: Design and implement a personal fitness plan, using evidence and evaluate how that reflects knowledge and application of fitness-training principals (FITT) and the components of skill related fitness. • 2.2.12.PF.4: Determine the role of genetics, age, nutrition, sleep, the environment, and exercise type on body composition and personal health (e.g., anabolic steroids, human growth hormones, stimulants). • 2.2.12.PF.5: Analyze fitness knowledge in strength, conditioning, agility, and the physiological responses of the energy systems effects on the mind and body before, during, and after physical fitness activities.
<p>Lifelong Fitness</p>	
<p>Core Idea</p>	<p>Performance Expectations</p>
<p>Healthy habits and behaviors are created by personal learning experiences, knowledge, beliefs, and goals towards living and maintaining a healthy lifestyle of fitness, self-expression, social interaction, and enjoying movement in a safe and healthy environment (e.g., golf, tennis, badminton, martial arts, bowling, kayaking, ping-pong, cricket, hiking, biking, swimming).</p>	<ul style="list-style-type: none"> • 2.2.12.LF.1: Apply and share a movement and physical fitness vocabulary that is intrinsic to motivate oneself, to impact family, and others in a community. • 2.2.12.LF.2: Develop a sense of openness and willingness when participating in physical fitness activity to share and learn experiences from your own and other cultures. • 2.2.12.LF.3: Examine building to a level of fitness to successfully participate in a range of different physical activities during a lifetime. • 2.2.12.LF.4: Exhibit responsible social behavior by including and cooperating with classmates of all skill levels, assisting when needed, and collaborating respectfully to solve problems in groups, teams, and in pairs during physical activity. <ul style="list-style-type: none"> • 2.2.12.LF.5: Describe the social benefits gained from participating in physical activity (e.g., meeting someone, making friends, team work, building trust, experiencing something new).
<p>Community resources can support a lifetime of wellness to self and family members.</p>	<ul style="list-style-type: none"> • 2.2.12.LF.6: Implement a financial plan for participation in physical activity in the community for self and family members. • 2.2.12.LF.7: Analyze the current and future impact of globalization and technology on the influences of participation in sports, games, physical fitness activities, dance, gaming, outdoor adventure, viewing sports, and social and emotional connections.

- 2.2.12.LF.8: Identify personal and community resources to explore career options related to physical activity and health.

Nutrition

Core Idea	Performance Expectations
<p>The balance of food intake and exercise is a vitally important component of nutritional wellness, and is tempered by factors like age, lifestyle, and family history.</p>	<ul style="list-style-type: none"> • 2.2.12.N.1: Compare and contrast the nutritional trends, eating habits, and the impact of marketing foods on adolescents and young adults nationally and worldwide. • 2.2.12.N.2: Determine the relationship of nutrition and physical activity to weight loss, gain, and maintenance. • 2.2.12.N.3: Analyze the unique contributions of each nutrient class (e.g., fats, carbohydrates, protein, water, vitamins, minerals) to one’s health and fitness. • 2.2.12.N.4: Implement strategies and monitor progress in achieving a personal nutritional health plan. • 2.2.12.N.5: Research recent trends in plant based and organic food choices and industries that have shown an impact on lowering heart, cancer, diabetes, and other diseases.

 Participation
 Rubrics COMPETENCY V: SELF AWARENESS and DIRECTION - Determination
 Written Tests (Learning and Evaluation)
 Skills Tests
 Self-Assessment - COMPETENCY V: SELF AWARENESS and DIRECTION
 Peer Assessment
 Project (Analyzing data)

Objectives

Students will know or learn:

- Fitness components
- Aerobic and anaerobic exercise terminology
- Calculate target heart rate
- Benefits of cardiovascular exercise

- Strength training principles
- Concepts, myths, and benefits of weight training.
- Muscle names, their actions, and exercises to train those muscles.

Students will be able to:

- Define the terms aerobic and anaerobic
- Define cardiovascular fitness
- Describe how aerobics contributes to cardiovascular fitness
- Define pulse, resting pulse, target zone and maximum heart rate
- Calculate individual resting heart rate, target zone, maximum heart rate
- Describe the health benefits of aerobics
- Discuss the health benefits of strength training
- Apply safety regulations will participating in strength training activities
- Create a personal fitness plan

Unit 3:

Fitness Testing

Summary and Rationale

Fitnessgram is a fitness assessment and reporting program for youth. The assessment includes a variety of health related physical fitness tests that are used to determine students' overall physical fitness and suggest areas for improvement when appropriate. The purpose of Fitnessgram is really three-fold: to assess students' health-related components of fitness, to report the scores to students and parents and finally, to use the information to educate students. Test results are presented in a broader context of what it means to be physically fit, and suggest ways that students can be more physically active and improve their level of fitness to help them reach the Healthy Fitness Zone standards for each test measure.

Unit 4: Badminton 2

Summary and Rationale

The purpose of this unit is to continue to develop the skills necessary to participate in the game of badminton. As well as to create an interest and a level of success in the game so that the students will want to continue to participate for the rest of their lives. Throughout this unit of study, students will experience the advancement of effective movement development and fitness through badminton skills and game participation. Skill development will include focusing on the development of the serve, the drop, the clear, the smash, and offensive and defensive strategies.

Unit 5: Volleyball 2

Summary and Rationale

Volleyball is an activity which can be enjoyed by all students. Students will learn the necessary skills to develop an appreciation for the game. Volleyball is a game that continues to develop and challenge hand-eye coordination and reaction time. Volleyball requires students to move quickly in response to the ball, which helps with agility and coordination. The volleyball unit will serve as an activity to foster teamwork, socialization and skill development.. The goal of this unit is to continue to develop the basic skills and movement patterns necessary to successfully participate in the game of volleyball. This unit will also focus on making appropriate game speed decisions and strategies about where to send the ball, what skill to choose, and what tactics would be best suited for their opponents. Students will apply rules knowledge through officiating.

<p>Students will be able to understand that fitness activities incorporated in our daily lifestyle are important for overall good health.</p> <p>Students will be able to understand that teamwork is a fundamental and necessary skill of volleyball. Students will be able to understand that the development of better eye-hand coordination is important in the game of volleyball.</p>	
Essential Question	

What are the rules, skills, and game strategies involved in volleyball?
How do teamwork and sportsmanship affect game play?
How does participation in volleyball improve physical fitness?
What offensive and defensive formations will we use during game play?
Where the ball should be passed in order to run a successful offense?
What are the best ways to attack a defense?
At what point, do the players need to be ready to attack?

Rubrics (COMPETENCY I: COLLABORATION – Teamwork)

Objectives

Students will know or learn:

- Students will learn basic rules, history, and terms of the sport
- Students will be able to learn the basic rules and regulations of volleyball.
- Students will understand the types of formations used on offense.
- Students will be able to recognize and describe the different types of hits.
- Students will recognize when to use each particular shot.
- Students will be able to describe the formation used for offense and defense
- Definition of teamwork
- Application of teamwork
- Terminology of the game of volleyball
- Fundamental skills
- The “Ready” position
- Different types of serves
- “Bumping” and “setting” the ball
- The “Spike”
- Rules

Students will be able to:

- Students will perform short and medium forearm passes.
 - Students will perform short and medium overhead passes.
 - Students will perform the proper techniques for spiking a volleyball.
 - Students will have a variety of shots that they can take when their team is attacking.
 - Students will develop proper offensive and defensive formations during game play.
 - Students will get into the proper defensive position when the other team is attacking the ball ·
- Students will apply rules knowledge will officiating game play.

Unit 6: Adventure Activities

Summary and Rationale

During this unit students will experience critical motor skills in an environment that is fun and non-threatening. Students will learn to share or follow rules as they experience a process that allows them to explore, to question, to participate, and to reflect on themselves. Students will develop the ability to work effectively with others. Develop leadership qualities and investigate strategies to solve conflicts and create solutions. Students will have the opportunity to explore decision making process, of which risks are and are not positive for each individual. Students will learn to demonstrate respect and understanding for all persons despite their individual differences.

Unit 7: Indoor/Outdoor Team Games	
Summary and Rationale	
<p>During this unit, students will understand basic skills and cognitive concepts that will enable them to participate in indoor/outdoor team games activities. Physical participation as well as the development of cognitive processes will allow students to be actively involved in various forms of indoor/outdoor team games competitions, as well as comprehend rules and strategies that are essential for participation. As students develop basic physical skills, it will allow them to participate in a variety of related activities as well as provide a fundamental base on which to build advanced skills and participate at higher levels of activity. Understanding and comprehending rules and strategies will allow students to socialize, interact, and communicate with others through sports and related activities.</p>

Unit 8: Strength Training 2

Summary and Rationale

During this unit students will be introduced to a basic instructional program in strength and conditioning development. The unit will include basic anatomy, muscular function, strength training principles, basic program design and correct exercise technique and safety. The students will develop an understanding of these concepts and will participate in individual training programs. Through strength training exercises, the students will be able to learn the short and long term benefits of fitness. Students will learn how strength training is one component in overall fitness and healthful living. Students will learn the basics of program design and how to formulate a personal workout routine.

Grade: 11

Unit 9: Pickleball

Summary and Rationale

During this unit, students will continue to review the basic skills and cognitive concepts that will enable them to participate in pickleball. Physical participation as well as the development of cognitive processes will allow students to be actively involved in various forms of pickleball competitions, as well as comprehend rules and strategies that are essential for participation. As students develop basic physical skills, it will allow them to participate in a variety of related activities as well as provide a fundamental base on which to build advanced skills and participate at higher levels of activity. Understanding and comprehending rules and strategies will allow students to socialize, interact, and communicate with others through sports and related activities.

Objectives

Students will know or learn:

- Safety procedures
- Basic skills including serve, forehand, backhand, volley and smash.
- Offensive and defensive strategies
- Basic rules
- Role of the officials

Students will be able to:

- Demonstrate a proper serve by serving into the proper service area.
- Demonstrate a proper forehand drive by hitting returns into the opponent's court.
- Demonstrate a proper backhand drive by hitting returns into the opponent's court.
- Demonstrate a proper volley shot by hitting returns into the opponent's court.
- Demonstrate a proper smash by hitting into the opponent's court.
- Demonstrate basic knowledge of Pickleball court dimensions and recognize the following areas on the court: non-volley zone, service areas (4), backline (2), and sideline.
- Apply basic rules of pickleball through officiating matches.
- Demonstrate the ability to function as a teammate by working in pairs during tournament play

Unit 11: Golf 1

Summary and Rationale

The goal of this unit is to introduce the fundamental skills of golf. Students will discover the importance of flexibility, coordination, and muscle strength in order to be successful in the game of golf. Through the sport of golf, the students will be physically active and can work towards improving their hand-eye coordination. This unit will teach the skills of the various golf swings and basic terminology. The nature of golf provides not only a lifetime form of exercise, but also an outlet for social networking.

Unit 12: Frisbee Golf	
Summary and Rationale	
<p>The goal of this unit is for students to combine multiple skills of Frisbee and Golf in order to participate in this sport. Higher level thinking skills are needed in order to strategize and be successful throughout this unit. Frisbee Golf has the fitness advantages of aerobic exercise, hand-eye coordination, with the pleasure and excitement of playing a fun game. In this unit, exercise is disguised as "play", so the students will look forward to participating in it every class. The complex nature of Frisbee golf provides ever-changing challenges for the students, which keeps up their interest.</p>

Movement Skills and Concepts

Core Idea	Performance Expectations
Advanced technique and concepts will elevate student's confidence, performance, skills, and participation in physical activity (e.g., games, sports, aerobics, fitness activities).	<ul style="list-style-type: none"> • 2.2.12.MSC.1: Explain and demonstrate ways to apply movement skills from one game, sport, aerobics, or recreational activity to another including striking skills (e.g., tennis, badminton, ping pong, racquetball, pickle ball). • 2.2.12.MSC.2: Analyze application of force and motion (e.g., weight transfer, power, speed, agility, range of motion) and modify movement to impact performance.
The quality of feedback from others, self assessment as well as effort and repetition influences movement skills, concepts, and performance.	2.2.12.MSC.3: Design, lead and critique rhythmic and physical activity that includes variations in time, space, force, flow, and relationships (e.g., creative, cultural, social, aerobics dance, fitness).
Individual and team execution requires interaction, respect, effort, and positive attitude.	<ul style="list-style-type: none"> • 2.2.12.MSC.4: Analyze etiquette, responsibilities, and preparation of players, officials, trainers, and other participants and recommend strategies to improve their performance, participation, and behavior. • 2.2.12.MSC.5: Develop rule changes to existing games, sports, and activities that enhance participation, safety, and enjoyment.

Physical Fitness	
Core Idea	Performance Expectations
Physical and emotional growth often relies on taking personal responsibility for developing and maintaining physical fitness levels that also provide opportunities for self expression, enjoyment, and emotional satisfaction.	<ul style="list-style-type: none"> • 2.2.12.PF.1: Compare the short- and long-term benefits of physical activity and the impact on wellness associated with physical, mental, emotional fitness through one's lifetime. • 2.2.12.PF.2: Respect and appreciate all levels of ability and encourage with care during all physical activities. • 2.2.12.PF.3: Design and implement a personal fitness plan, using evidence and evaluate how that reflects knowledge and application of fitness-training principals (FITT) and the components of skill related fitness. • 2.2.12.PF.4: Determine the role of genetics, age, nutrition, sleep, the environment, and exercise type on body composition and personal health (e.g., anabolic steroids, human growth hormones, stimulants). • 2.2.12.PF.5: Analyze fitness knowledge in strength, conditioning, agility, and the physiological responses of the energy systems effects on the mind and body before, during, and after physical fitness activities.
Lifelong Fitness	
Core Idea	Performance Expectations
Healthy habits and behaviors are created by personal learning experiences, knowledge, beliefs, and goals towards living and maintaining a healthy lifestyle of fitness, self-expression, social interaction, and enjoying movement in a safe and healthy environment (e.g., golf, tennis, badminton, martial arts, bowling, kayaking, ping-pong, cricket, hiking, biking, swimming).	<ul style="list-style-type: none"> • 2.2.12.LF.1: Apply and share a movement and physical fitness vocabulary that is intrinsic to motivate oneself, to impact family, and others in a community. • 2.2.12.LF.2: Develop a sense of openness and willingness when participating in physical fitness activity to share and learn experiences from your own and other cultures. • 2.2.12.LF.3: Examine building to a level of fitness to successfully participate in a range of different physical activities during a lifetime. • 2.2.12.LF.4: Exhibit responsible social behavior by including and cooperating with classmates of all skill levels, assisting when needed, and collaborating respectfully to solve problems in groups, teams, and in pairs during physical activity. • 2.2.12.LF.5: Describe the social benefits gained from participating in physical activity (e.g., meeting someone, making friends, team work, building trust, experiencing something new).
Community resources can support a lifetime of wellness to self and family members.	<ul style="list-style-type: none"> • 2.2.12.LF.6: Implement a financial plan for participation in physical activity in the community for self and family members. • 2.2.12.LF.7: Analyze the current and future impact of globalization and technology on the influences of participation in sports, games, physical fitness activities, dance, gaming, outdoor adventure, viewing sports, and social and emotional connections. • 2.2.12.LF.8: Identify personal and community resources to explore career options related to physical activity and health.

Nutrition	
Core Idea	Performance Expectations

<p>The balance of food intake and exercise is a vitally important component of nutritional wellness, and is tempered by factors like age, lifestyle, and family history.</p>	<ul style="list-style-type: none"> • 2.2.12.N.1: Compare and contrast the nutritional trends, eating habits, and the impact of marketing foods on adolescents and young adults nationally and worldwide. • 2.2.12.N.2: Determine the relationship of nutrition and physical activity to weight loss, gain, and maintenance. • 2.2.12.N.3: Analyze the unique contributions of each nutrient class (e.g., fats, carbohydrates, protein, water, vitamins, minerals) to one’s health and fitness. • 2.2.12.N.4: Implement strategies and monitor progress in achieving a personal nutritional health plan. • 2.2.12.N.5: Research present trends in plant based and organic food choices and industries that have shown an impact on lowering heart, cancer, diabetes, and other diseases.

<p>CPI #</p>	<p>Cumulative Progress Indicator (CPI)</p>
<p style="text-align: center;">Instructional Focus</p>	
<p>Enduring Understandings</p>	
<p>The importance of physical activity as a lifelong process. The values of physical fitness and strive for personal improvement. Yoga concentrates on core training principles and flexibility which can aid in overall fitness.</p>	
<p>Essential Question</p>	
<p>What changes in lifestyle will lead to improved health and wellness? How will your lifestyle choices affect your lifestyle?</p>	
<p>Evidence of Learning (Assessments)</p>	
<p>Teacher Observation Participation Peer Assessment Self-Assessment COMPETENCY IV: PROBLEM SOLVING (Use of Information) Skill Analysis Written Tests Rubrics COMPETENCY V: SELF AWARENESS and DIRECTION (Determination) COMPETENCY I: COLLABORATION (Working Cooperatively)</p>	
<p>Objectives</p>	

Students will know or learn:
· There is a connection between sound mind and sound body.

· History and types of yoga
· How to use their breathing to calm and relax their body.
· How to design and implement a yoga routine that meets the needs of their own body.

Students will be able to:
· Perform the proper technique and form of a variety of breathing exercises.
· Perform the proper technique required in a warm up program.
· Perform the proper technique and form of a variety of poses.
· Participate in relaxation exercises.
· Discuss the history of yoga.
