Language Arts	
Reading: Informational Text	
RI.11-12.1.	Accurately cite strong and thorough textual evidence, (e.g., via discussion, written response, etc.), to support analysis of what the text says explicitly as well as inferentially, including determining where the text leaves matters uncertain.
RI.11-12.3.	Analyze a complex set of ideas or sequence of events and explain how specific individuals, ideas, or events interact and develop over the course of the text.
RI.11-12.5.	Analyze and evaluate the effectiveness of the structure an author uses in his or her exposition or argument, including whether the structure makes points clear, convincing, and engaging.

Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences claim(s), counterclaims, reasons, and evidence. B. Develop claim(s) and counterclaims avoiding common logical fallacies and using sound reasoning and thoroughly, supplying the most relevant evidence for each while pointing out the strengths and limitations of both in a manner that anticipates the audience’s knowledge level, concerns, values, and possible biases. C. Use transitions (e.g. words, phrases, clauses) to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. D. Establish and maintain a style and tone appropriate to the audience and purpose (e.g. formal and objective for academic writing) while attending to the norms and conventions of the discipline in which they are writing. E. Provide a concluding paragraph or section that supports the argument presented (e.g., articulating implications or the significance of the topic).
W.11-12.2.	Write informative/explanatory texts to examine and convey complex ideas, concepts, and information clearly and accurately through the effective selection, organization, and analysis of content. A. Introduce a topic; organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding

Unit 2	
The Nature of Conflict and “Community	
Summary and Rationale	
<p>This unit will explore the basics of conflict, including where conflict originates and how differing perspectives often drive conflict. Not all conflict is bad; in fact, the greatest advancements in history have been driven by conflict. Understanding the various perspectives upon which conflict is based offers the possibility of avoiding dysfunctional conflict and developing better conflict management strategies. Working with the community to resolve conflict is key in community policing. Every community is made up of a diverse set of sub-groups that differ from each other in terms of needs, desires, goals, and objectives. As the needs of each community continue to change, police departments are constantly addressing the challenges of creating a sense of police-community unity by adopting new strategies and a “New Professionalism.”</p>

Unit 3

Managing Conflict and Understanding Differing Perspectives

Summary and Rationale

This unit will explore the various styles of policing related to the use of police discretion, along with the implications for improving police-community relations beginning with identifying two distinct contexts of police-citizen interaction that guide officer discretion. Modern policing demands for a more humanistic approach by police officers within the communities they serve. Inherent to this goal is developing a framework for understanding the cultural diversity that permeates the urban communities. Developing this understanding is a first step in building rapport, developing better police-community relationships, and managing conflicts. Subsequently, improving police-community relations will help law enforcement in the war against terrorism and affirm their role in providing homeland security. Additional areas of focus will include the development of a more active approach by police departments to engage community members through youth mentoring programs, substance abuse education, and the implementation of school safety officers.

Unit 4	
Problem Solving Practical Exercises - Taking Action	
Summary and Rationale	
<p>In this unit, the students will use the knowledge gained from the previous units in the course to conduct community research to discover areas where community policing programs could be enhanced. Students will select an area of interest and work cooperatively to conduct research, identify solutions, weighing advantages and disadvantages, propose a solution that requires action within the bounds of the state and federal laws, and propose an action plan that could influence the appropriate agencies to consider or adopt their solution. A focus would be to propose community police programs that could be implemented at the middle and high school levels.</p>
