June 2025

Health Laws of the State of New Jersey require that all public school students be immunized against certain diseases. The immunization requirement for children born on or after January 1, 1997 has been changed.

Every child born on or after January 1, 1997 and entering Grade 6 (or a comparable age level special education program with an unassigned grade) shall have received one dose of Tdap (Tetanus, diphtheria, acellular pertussis) and one dose of meningococcal-containing vaccine, such as medically-preferred meningococcal conjugate vaccine. The Tdap and meningococcal vaccines must be administered no earlier than the 10th birthday.

Please have your family physician complete the form below indicating the dates that your child has received these vaccines. To avoid exclusion from school, this form should be returned to your school nurse no later than August 15, 2025.

If you have any questions, please feel free to contact me.

Sincerely,

Frank Francia
Principal
Yantacaw Elementary School
